

Process to become a registered patient at FMB practice:

Note: Our GPs will not be able to see you until this process is complete

1. Complete a patient enquiry form

This is your expression of interest, not a registration form.

This is necessary to allow the doctors some discretion in terms of accepting new patients. Reasons for the need for this include doctors' workload, health or leave.

2. Practice will contact you to confirm your application acceptance

You will then be invited to come in to complete the formal registration process.

This will include confirmation of identity – your passport or drivers licence

You will sign a records release form which we send to your previously registered GP to allow file transfer to occur.

3. Once these records are received you can then make appointments to see our doctors.

Note: First new patient consultation typically involves a 15 minute nurse consult followed by a 30 minute doctor consult so that your past history, regular medications, recalls and other relevant things are reviewed.

The time to receive notes is dependent on your past medical practice transferring your file electronically to us.
